Directors Notes:

First review of Toddler Time under Amy Larsen. Attendance began small, but has grown in the last few weeks. Amy has chosen good stories, but needs to incorporate movement and music. She enjoys the sessions, as do the kids, and will grow as her comfort levels grow. Goal for next review, in summer, is a 7. We receive good comments from nannies and moms, with one complaint about lack of music. I recommend continuing the program and continuing to train Amy in the art of Toddler story times.

Directors Notes:

Last review gave a value of 6. Attendance improved over the summer. Amy has improved her use of movement during story time and is still working at increasing the use of music. Goal for next review, in December, is a solid nine (with the exception being number of participants.) Good comments are received from parents and on a whole, toddler time has improved over the last six months. I recommend continuing the program.
